

# Getting your BYO device ready for school: BYOxLink via Intune

## Mac version

Intune is a secure mobile management system that allows you to access the school's network.

These instructions will show you how to enrol a BYO Mac device into Intune and install an application. This process may take up to 15 minutes to complete.

Before you start, please have ready the email address and password that has been supplied to you by the school. If you do not have this information, you will not be able to successfully complete the installation. Please contact your school to obtain these details.

These instructions are for High Sierra or later versions of MacOS. You may find some of the screens look different to the ones provided here if you have an older version of MacOS or there are changes made to Intune.

If the installation fails at any time, please re-open the Intune app and try again.

**Please note:** These instructions are provided for testing purposes only as part of a pilot project. If you have any problems with installing Intune or using it afterwards, please contact your school for assistance.
